**Equine Undergraduate Intern Program**

**Spring Semester**

**Philosophy**

Peterson & Smith Equine Hospital is a full service equine practice in the heart of Ocala, Florida’s horse country. Established in 1981 it has grown to one of the most highly recognized equine practices in the United States. We are always striving to remain one of the leading veterinary practices on an international level by providing state-of-the-art diagnostics, surgery and medicine for our patients and to foster a relationship of professionalism and integrity with our clients. Our services provided range from single patient management to large farm consultations. In addition to offering educational and practical experience opportunities to students with an equine interest, we offer continuing education opportunities to both veterinarians and horse owners.

The program has now been in operation since 2004. We are hoping to find students for our hospital (surgery/medicine/sports medicine), our equine reproduction center; and our ambulatory department. (Ambulatory students must commit to working from mid-January to mid-June.) Details of the proposed internships are attached they will run during the spring semester - approximately mid-January through mid-May. Summer internships run mid-May through mid-July.

We will concentrate on the areas of: surgery, internal medicine, diagnostic imaging, theriogenology, emergency medical/surgical care, sports medicine, general medicine, and herd health. Students will receive training in basic handling and restraint, and assisted in developing a set of basic veterinary technician skills including, but not limited to: surgical scrub, flexing/lameness examinations, x-ray plate orientation, foal restraint, drawing up medications, administration medications, TPR.

It is our intent that this opportunity will fulfill the practical experience requirements necessary for each student’s area of study, and any personal goals that the students have for the internship.

**Deadlines:**

**Spring:** Applications to be received by October 1st
Selections to be made by November 1st
Offer to be accepted or declined by November 15th
